

Dough Forming and Cutting

The aim of this course is to introduce learners to the processes of forming and cutting dough. This course will provide learners with knowledge and skills regarding the rotary moulding process, sheeting, gauging and cutting process, laminating process, and how to perform first line maintenance and control stock of layering powder and toppings.

- ✓ INTRODUCTION TO DOUGH FORMING
- ✓ ROTARY MOULDING PROCESS
- ✓ SHEETING, GAUGING AND CUTTING PROCESS
- ✓ LAMINATING PROCESS
- ✓ EXTRUSION WIRE CUT PROCESS
- ✓ EXTRUSION ROUT PRESS PROCESS
- ✓ PERFORMING FIRST LINE MAINTENANCE
- ✓ CONTROLLING STOCK OF LAYERING POWDER AND TOPPINGS
- ✓ HEALTH AND FOOD SAFETY REQUIREMENTS

At the end of this course learners will be able to:

- Understand the process of forming and cutting dough
- Understand the rotary moulding process
- Understand the sheeting, gauging and cutting process
- Understand the laminating process
- Understand the extrusion wire cut process
- Understand the extrusion rout press process
- Know how to perform first line maintenance
- Control stock of layering powder and toppings
- Know the health and food safety requirements
